

Fastlane Visitor Card Return System

Concept

In order to collect access cards from visitors leaving a building IDL have created their Visitor Card Return unit. Staff use a card reader mounted behind the frosted acrylic window. Visitors however are invited to place their access card in the return slot. The card is drawn in and slowly passes a secondary card reader which authorises their exit. The cards are then dropped in to a locked tray where they can be collected by a guard at a later stage.

End Mounted Card Return System

This is ideal for use with the Fastlane *plus* range of turnstiles where the visitor card return system is mounted in the end of the pedestal.

Fastlane Visitor Card Return System

Free Standing Visitor Card Return System

This card return system is ideal for use with the Fastlane Passgate and Intelligate models, where there is no room in the pedestals for the system to be mounted internally.

The dimensions are:

Diameter	160 mm (top)
	162 mm (base)
Height	987 mm
